PROJECTS

EventEase - Venue Booking System (C#, SQL Databases & Servers)

- Designed and implemented a venue/event booking system with full CRUD functionality, file uploads, and deployment to Azure.
- Included models for venues, events, bookings, and leads.
- Built a cloud-based web app allowing users to upload and manage images stored in Azure Blob

Storage

ChatAppFinal(Java)

- Developed a registration and login chat app with validation (username, password, cellphone), message encryption, tracking, search, delete, and report features.
- Used JSON for persistent message storage and included unit testing with JUnit.

Movie Ticket Sales Report(Java)

- Created a GUI-based ticket sales system with input validation, VAT calculation, report generation, and file saving using JOptionPane dialogs.

CybersecurityBot Console Application(C#)

- Built a console app that responds to 30+ cybersecurity questions, includes audio greeting, sentiment detection, and a question-answer array.
- Developed a GUI-based chatbot with dynamic conversation flow, keyword recognition, sentiment detection, and a quiz mini-game.
- Integrated an activity log, reminder assistant, and NLP simulation features.

CybersecurityBot Console Application(C#) Web Development Projecta (Visual Studio,Java,HTML, CSS,JavaScript and Python)

- Built multiple responsive websites using Visual Studio.
- Technologies included:
 - **HTML/CSS** for structure and styling
 - **JavaScript** for interactivity
 - **Java** and **Python** for backend logic in selected projects
- Examples include:
 - **Portfolio Website** (HTML/CSS/JavaScript)
 - **Student Portal Prototype** (Java backend + HTML front-end)
 - **Online Calculator** (Python + HTML GUI using Flask)
